A Study of Some Punctuation Errors Found in the Taisho and CBETA Diamond Sutra Based on Sanskrit-Chinese Comparative Studies

Shu-Fen Chen
National Tsing Hua University, Taiwan

Bernard Montoneri
Providence University, Taiwan

Many scholars are aware that the Taishō Tripitaka contains many errors: attribution, dating of the sutras, typography, punctuations, textual errors, etc. The correct punctuation of a sutra is not a luxury; instead it is a basic requirement. A wrong punctuation alters greatly our understanding of the text and is the origin of many misinterpretations. Even the modern electronic version of Taishō Tripitaka, namely, Chinese Buddhist Electronic Text Association (CBETA) version also contains some punctuation errors. In this study, we will compare Xuan-Zang’s Chinese translation of Diamond Sutra with Gomez & Silk’s (1989) and Harrison & Watanabe’s (2006) Sanskrit texts. We aim to bring to light the problems of punctuations of the Chinese versions and to propose useful solutions to the Buddhist community and the other scholars in the field.

0. Introduction
The Chinese Buddhist Canon is an inexhaustible treasure which contains a lot of Middle Chinese data for linguists as well as many important religious and philosophical treatises. Millions of Buddhists and scholars are reading the Chinese Buddhist scriptures, or the translation of them to understand Mahayana Buddhism since most Sanskrit Buddhist scriptures have been lost. However, the earlier Buddhist scriptures are not punctuated. For example, a woodblock printed copy of the Diamond Sutra dated in 868 C.E., now preserved in the British Library, is "the earliest complete survival of a dated printed book"1 which does not contain any punctuation as shown in Figure 1.

Moreover, all earlier Buddhist Tripitakas are not punctuated. The first page of the same *Diamond Sutra* in Long Zang （龍藏）published between 1735 C.E. and 1738 C.E. is shown in Figure 2.

The first punctuated Chinese Tripitaka is *Taishō Shinshū Daizōkyō* （Taishō Tripitaka, 大正新脩大藏經）published between 1924 C.E. and 1929 C.E. Only one
punctuation mark is used, namely, the ‘period’.2

Figure 3: The first page of the Taishō Diamond Sutra.

The first page of the Diamond Sutra in Taishō Tripitaka (hereafter Taishō Diamond Sutra) is presented in Figure 3. Taishō Tripitaka is the most used and read version in the Buddhist as well as the academic circles. However, many scholars, such as Carl Bielefeldt and Lewis Lancaster (1975), are aware that the Taishō edition contains many errors. William M. Bodiford (2005) gives the following advice when introducing the Taishō:

“While the annotation provides alternate readings from other manuscripts or xylographic canons, this is not a true critical edition. The punctuation is frequently wrong—do not hesitate to try a different reading.”

Bhikshu Dharmamitra (2009: 6) also points out: “Those following the translation in the Chinese should be aware that Taisho scripture punctuation is not traceable to original editions, is often erroneous and misleading, and is probably best ignored altogether.” We think that scholars should not continue to accept as an immutable fact that their reference text is not accurate. The correct punctuation of a sutra is not a luxury, but a basic requirement. The Chinese Buddhist Electronic Text Association (CBETA), established in 1998, maintains and distributes free of charge an electronic version of the Chinese Buddhist Tripitaka. The CBETA is based on the Taishō (vols. 1-55 and 85). In many

2 In Figure 3, we can see some other punctuation marks, such as レ, ー, and ー, which are called kaeriten (返り点 (かえりてん)). These punctuation marks are used especially by Japanese scholars from the 8th century onward for the purpose of reading ancient Chinese texts.
cases, the original punctuation of the Taishō has been corrected, but with more or less success. It is not always coherent and accurate, and there is no explanation concerning the corrections. The punctuation has been modernized, but many punctuations marks are still incorrect and some sutras are still wrongly attributed and dated like those in the Taishō. This online version is very useful and represents an immense work. However, the punctuation marks have to be improved. In this study, we use the Diamond Sutra as a starting point because it is one of the most popular Buddhist scriptures in the world, and it has been widely studied by lay people, clerics and scholars. We would like to correct at least some of the mistakes concerning the punctuations because the meaning of passages could change, depending on where we choose to punctuate. As a matter of fact, a wrong punctuation alters gravely our understanding of the text and is the origin of many misinterpretations.

2. Our data

There are six versions of the Taishō Diamond Sutra as shown in Table 1:

We will first study the first and the earlier translation of the Sanskrit Diamond Sutra, namely, Kumārajīva’s translation. This version is the most read one among the Buddhist circle. The Sanskrit versions of the Diamond Sutra are given below:

---

3 The information in the parenthesis indicates where the translator(s) came from, in which dynasty in China they lived, and their life span periods.
a. Müllér’s critical edition in devanagari script (1881: 15-46), based on the following manuscripts received from Japan, Tibet, and China.

Gomez & Silk (1989) and Harrison & Watanabe (2006) will be our main sources for the Sanskrit version of the Diamond Sutra because there are the most reliable. However, of course, we will not fail to always refer to the other Sanskrit editions and especially to Pargiter’s critical edition (1916) of the Dandan Uiliq manuscript.

3. Punctuations based on Sanskrit

Chinese classics have no punctuation marks and they can be misinterpreted if one breaks the line inappropriately. The only punctuation mark used in the Taishō Tripitaka is ju hao 句號 (。) ‘period.’ The CBETA online edition uses a modern punctuation. In the CBETA Diamond Sutra, we find that ten different punctuation marks are used. For example, seven different punctuation marks can be found in the following extract:

時，長老須菩提在大眾中即從座起，偏袒右肩，右膝著地，合掌恭敬而白佛言：
「希有！世尊！如來善護念諸菩薩，善付囑諸菩薩。世尊！善男子、善女人，發阿耨多羅三藐三菩提心，應云何住？云何降伏其心？」 (CBETA, T08, no. 235, p.748, c24-29)

There are three more punctuation marks used in the CEBETA Diamond Sutra, as shown in the following extracts:

a. 佛言：「善哉，善哉！須菩提！如汝所說：『如來善護念諸菩薩，善付囑諸菩薩。』汝今諦聽，當為汝說。善男子、善女人，發阿耨多羅三藐三菩提心，應如是住，如是降伏其心。」 (CBETA, T08, no. 235, p.748, c29-p.749, a4)

b. 佛告須菩提：「是經名為“金剛般若波羅蜜”。以是名字，汝當奉持。」 (CBETA, T08, no. 235, p.750, a12-13)

c. 須菩提！若有善男子、善女人，以恒河沙等身命布施；若復有人，於此經中，乃至受持四句偈等，為他人說，其福甚多。 (CBETA, T08, no. 235, p.750, a23-26)
The ten punctuation marks used in the CBETA *Diamond Sutra* are summarized in Table 2 below:

### Table 2. The ten punctuation marks used in the CBETA *Diamond Sutra*

</tr>
</tbody>
</table>

However, the tenth one, namely, the title mark (""") used in the CBETA *Diamond Sutra* is completely wrong. It should be 《》. Thus, sentence 2(b) should be changed to: 佛告須菩提：「是經名為《金剛般若波羅蜜》。以是名字，汝當奉持。」.

Even when the punctuation is modernized in the CBETA *Diamond Sutra*, it is not always coherent. Therefore, it is difficult for modern readers to fully understand sutras. In this section, we point out some punctuation errors found in either *Taishō Tripitaka* or CBETA based on Chinese-Sanskrit comparative studies.

### 3.1. A VP or separate clauses

In *Taishō*, *bushi* 布施 ‘to give alms’ and *fude* 福德 ‘merits’ are a VP, namely, *bushi* 布施 is the verb, and *fude* 福德 is the object. They are in the same clause. However, in CBETA, there is a common between the two words, that is, *bushi* 布施 is the verb of the preceding sentence while *fude* 福德 is the subject of the second sentence.

---

4 The enumeration comma *dunhao* 頓號 (,) is used as a sign of coordination, or a "pause mark." Its purpose is to separate words constituting a list. In English, a common (,) is usually used.

5 It is the punctuation mark used to enclose the title of a book, a newspaper or a journal. In English, there is no punctuation mark used to specify titles; instead, they are marked in italics.
The difference is shown in the following example:

\[
\text{Taishō: } \text{須菩提。菩薩無住相布施福德。亦復如是不可思量}
\]

\[
\text{CBETA: } \text{須菩提！菩薩無住相布施，福德亦復如是不可思量。}
\]

(T08, no. 235, p.749, a18-19)

The original Sanskrit text is therefore important at this point. Müller’s (1881), Conze’s (1958), and Schøyen’s (2006) versions are given as follows:

Müller (1881), Conze (1958):

\[\text{evam eva Subhūte yo bhodhisattvo ’pratiṣṭhito dānaṃ dadāti, tasya Subhūte puṇyaskandhasya na sukaraṃ pramāṇam udghātum |} \]

Schøyen (2006):

\[\text{evam etat subhūte yo bhodhisattvo ’pratiṣṭhito dānaṃ dadāti tasya puṇyaskandhasya na sukaraṃ pramāṇam udghātum |} \]

"Subhūti, the merits attained by bodhisattvas who practice charity without abiding in its signs are also incalculable like this." (Muller 2004)

We can see clearly that \textit{bushi} 布施 is translated from Sanskrit \textit{dānaṃ dadāti}, which is a VP itself. The word \textit{dānaṃ} means ‘the act of giving, donation, gift’ which is a noun and the word \textit{dadāti} means ‘gives, third person singular’ which is a verb. The word \textit{fude} 福德 is translated from Sanskrit \textit{puṇyaskandha} ‘a heap of merits’ which is the subject of the subordinate sentence. Thus, it is very clear that the CBETA version is correct: there should be a common between \textit{bushi} 布施 ‘to give alms’ and \textit{fude} 福德 ‘merits.’

3.2. Ekasmin samaye

The phrase \textit{rushi wo wen yishi} 如是我聞一時" is the traditional opening of Buddhists texts. For centuries, monks and scholars have debated over the meaning of this sentence and whether \textit{ekasmin samaye} belongs to the preceding words \textit{evam maya śrutam} or not. It can have two meanings as shown below:

a. Evaṃ mayā śrutam, ekasmin samaye Bhagavān……
   （如是我聞：一時，世尊……）”

b. Evaṃ mayā śrutam ekasmin samaye, Bhagavān……
   （一時如是我聞：世尊……）”

In example a, \textit{ekasmin samaye} ‘at one time’ belongs to the following sentence, and it means ‘at the time when the Lord was preaching.’ In b, \textit{ekasmin samaye} belongs to the
first sentence, it means ‘at the time when Ananda was listening to what the Lord said.”
First, we need to look at the Sanskrit editions and to analyze the Sanskrit terms from "evam" to "arame".

Table 3. Sanskrit editions, section 1, first sentence

<table>
<thead>
<tr>

<tr>
<td>Schøyen p.1129</td>
<td>evam maya śrutam ekasmin samaye bhagavān śrāvastyām viharati sman jetavane ‘nāthapindadasyārme</td>
<td></td>
</tr>
</tbody>
</table>

As we can see in the table above, Müller (1881) breaks the line after śrutam. He translates "evam maya śrutam) ekasmin sanage" by "Thus it was heard by me: At one time" (Müller 1894: 111). We attribute his choice to the fact that he was influenced not by the Sanskrit, but by the Chinese versions in his possession. We can see in table 4 below that the Chinese texts break the line after rushi wo wen 如是我聞 ‘thus I have heard’. Rushi foxue yanjiushi’s (1995) edition punctuates the same way, but adds a punctuation mark after yishi 一時 ‘at one time’. They use Müller (1881) and they follow the Chinese way to punctuate the beginning of the first sentence (Rushi foxue yanjiushi 1995; Vol.3, p.353, for example: 如是我聞。一時，rushi wo wen. yishi.). Harlez (1891) punctuates the way Chinese translations often do, with a break after yish ("heard") and a break after sh ("circumstance"): "C’est ainsi que je l’ai entendu dire. En une certaine circonstance, le bienheureux…". ("Thus have I heard. On a certain occasion, the World-Honored One…”) Conze (1974: 27) prefers to break the line after sanage, like the Tibetan manuscript (Harrison & Watanabe 2006: 112). However, as we can see in the

---

6 Reading of the Schøyen manuscript by Harrison & Watanabe (2006: 103).
7 According to Harrison & Watanabe (2006: 103), there is a virama after bhagavan.
8 The a after r is missing in "arame". It is correctly restored in the reconstruction made by Harrison & Watanabe (2006: 112).
12 Rushi foxue yanjiushi (1995; 4: 553). We note that, in volume 4, there are many typographical errors in the different foreign translations of the Diamond Sutra. For example, “vénératon” page 553 instead of vénération. Original text, Harlez (1891: 448-449).
reading of the Schøyen manuscript, there is a mark of punctuation neither after śrutam nor after samaye. Brough (1950) quoted Stäel-Holstein who said: "The question as to whether ekasmin samaye belongs to śrutam or to viharatti is discussed in a number of Buddhist commentaries attributed to Indians, and most of them seem to regard ekasmin samaye as belonging to the preceding words evam maya śrutam." As a result, we think that there should be no break after śrutam. In fact, if we really think about what this sentence is supposed to mean, it makes no sense to break the line: "This is what I (Ananda) have heard from Śakyamuni in the following circumstances". Now, if we continue to read the sentence, we can see that in Harrison & Watanabe (2006: 103-112), there is no punctuation mark after samaye. We should read the sentence from evam to Bhagavan without any break. The reading of the Schøyen manuscript shows something interesting, not seen in the other Sanskrit editions of the Diamond Sutra: according to Harrison & Watanabe (2006: 112), there is a punctuation mark after Bhagavant and Sugata ("a virama or the two dots also used to write the visarga"). The two scholars prefer to keep this "honoric" punctuation. T.238 respects this break after bhagavan. Here, the punctuation in the Taishō is correct and is confirmed by the reading of the Schøyen manuscript.

Table 4. 如是我聞 in the Taishō, section 1, first sentence

<table>
<thead>
<tr>
<th>Text</th>
<th>Translation</th>
</tr>
</thead>
<tbody>
<tr>
<td>T.235, p.748 c</td>
<td>如是我聞。一時佛在舍衛國祇樹給孤獨園。</td>
</tr>
<tr>
<td>T.236a, p.752 c</td>
<td>如是我聞。一時婆伽婆。在舍婆提祇樹給孤獨園。</td>
</tr>
<tr>
<td>T.237, p.762 a</td>
<td>如是我聞。一時佛婆伽婆住舍衛國祇陀樹林給孤獨園。</td>
</tr>
<tr>
<td>T.238, p.766 c</td>
<td>如是我聞。一時世尊。聞者遊行勝林中無親搏施與園中。</td>
</tr>
<tr>

<td>如是我聞。一時薄伽梵。在室羅筏。住誓多林給孤獨園。</td>
</tr>
<tr>
<td>T.239, p.771 c</td>
<td>如是我聞。一時薄伽梵。在名稱大城戰勝林施孤獨園。</td>
</tr>
</tbody>
</table>

We can observe that all the texts in the Taishō punctuate after rushi wo wen 如是我聞. None of the six texts breaks after yishi 一時. Only two texts don't break the line after the World-Honored One, T.235 (佛 Fo) and T.237 (佛婆伽婆 Boqiepo). T.220 alone has a punctuation mark after the name of the city (室羅筏 Shiluofa, 印度的城市 name + 中 zhong). All the texts break the line after 園 yuan (yuan zhong 園中 for T.238, the locative in T.238 is often translated by: name + 中 zhong; Chen 2006, p.294).

</table>

By respect for the Sanskrit original version (Schøyen manuscript), even if it feels a little strange to break the line between a subject and its verb ("the World-Honoured One dwelt in Śrāvastī"), we should keep a punctuation mark after Bhagavan in Sanskrit and in Chinese. All the Chinese texts should be corrected and, for a problem of coherence, have the same punctuation. There are two possible ways to break the line after Bhagavan in Chinese (Ｓｈｉｚｕｎ 世尊 or ｒｏｊｉｅｐｏ 婆伽婆). One is quite archaic and rarely used nowadays. It is a full width space used as an honorific marker after the name of Buddha. Example in T.238, we could write: Shizun Wenzhe youxing 世尊 閱者遊行 ("the World-Honoured One dwelt in Śrāvastī"). If we use the Western punctuation for the pinyin, Shizun ("World-Honoured One") and Wenzhe ("Śrāvastī") are capitalized. In conclusion, we propose to translate the beginning of the first sentence by: "Thus it was heard by me one time [when] the World-Honoured One dwelt in Śrāvastī, in the Jeta Grove, in Anāthaṇḍada’s Garden, …". As we saw before, ekasmin samaye is looking at both "evam maya śrutam" and at the rest of the phrase. "When" has been added to link these two groups. It is better not to put a punctuation mark in English after "World-Honoured One." However, a note should be added to explain why there is a break in Sanskrit and why there should be one in Chinese. Harrison (2006: 142) offers this translation: "This is the word as I heard it once when the Lord was staying in Śrāvastī, in Jeta’s Grove, at the monastery of Anāthaṇḍada."

---

13 聞者 Wenzhe corresponds to Śrāvastī. The verb 聞 in Chinese means "to hear"; it corresponds to the Sanskrit root शुरु. Dharmagupta, in T.238, is the only one to translate Śrāvastī by 聞者.

14 In Taiwan, Chiang Kai-shek is formerly referred to as 先總統 蔣公 (xian zongtong Jiang gong, "Former President, Lord Chiang"). This style is still used in very formal letters.
3.3. Punctuation marks added

There are no punctuation marks after the locative Śūṇḍīṭī as shown below:

须菩提！實無有法名為菩薩。 (CBETA, T08, no. 235, p.751, b07-08)

“Is there, Subhuti, any dharma named ‘Bodhi-being’?” (Conze 1974)

In Sanskrit, this is a relative clause (yo bodhisattvo nāma ‘which is called bodhisattvahood’) with a correlative clause (asti sa kaścid dharmaḥ ‘there is any dharma’). Although in Sanskrit, there is no punctuation mark between the two clauses, there is always a pause in reading the sentence. In Chinese, we propose a common after fa ‘dharma.’ A common in Chinese can be used as a ‘pause,’ and it makes the sentence more readable and understandable. Likewise, in the following example below there were no common between zhongsheng ‘sentient beings’ and Rulai 如來 ‘Tathāgata, thus-come’ in both the first and the second clauses:

實無有眾生如來度者，若有眾生如來度者，如來則有我、人、眾生、壽者。 (CBETA, T08, no. 235, p.752, a07-08)

nāsti Subhūte kaścit sattvo yas Tathāgatena parimocitaḥ, yadi punaḥ Subhute kaścit sattvo 'bhaviṣyad yas Tathāgatena parimocitaḥ syāt, sa eva Tathāgatasya atmagraho 'bhaviṣyat, sattvagrāho jivagrāhah pudgalagrāhoh 'bhaviṣyat. (Müller 1881)

“There is not any being whom the Tathagata has set free. Again, if there had been any being whom the Tathagata had set free, then surely there would have been on the part of the Tathagata a seizing of a self, of a being, of a soul, of a person.” (Conze 1974)

There are two relative-correlative constructions: (1) the correlative clause --- nāsti Subhūte kaścit sattvo “there is not any being” precedes the relative clause yas Tathāgatena parimocitaḥ “whom the Tathagata has set free;” (2) the correlative clause kaścit sattvo ‘bhaviṣyad “there had been any beings” precedes the relative clause yas Tathāgatena parimocitaḥ syāt “whom the Tathagata had set free.” In both relative-correlative constructions, correlative pronouns are omitted. We also propose that a common should be added to both clauses. Moreover, we think that there should be a semicolon, instead of a common, between the first two sentences. The proposed new

---

15 In Sanskrit, relative clauses usually precede correlative clauses; however, here the correlative clause is followed by the relative clause.
punctuation marks are given as follows:

a. 須菩提！實無有法，名為菩薩。

b. 實無有眾生，如來度者；若有眾生，如來度者，如來則有我、人、眾生、壽者。

3.4. Last sentence in the Diamond Sutra

There is a question regarding “Who is enraptured?” in the last sentence of Section 32 in the Diamond Sutra. The Sanskrit versions are given in Table 6:

<table>
<thead>
<tr>
<th>Müller [MM46]</th>
<th>idam avocad bhagavān āttamanāḥ sthavīra subhūtīs te ca bhikṣubhiṣkunyupāsakopāsikās te ca bodhisattvāḥ sadevamānuṣāsuraganḍhavaṣ ca loko bhagavato bhāṣitam abhyāmanadannya iti.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Conze 1974, p.62</td>
<td>Idam avocad Bhagavān. āttamanāḥ sthavīra Subhūtīs, te ca bhikṣu-bhikṣuny-upāsakopāsikās, te ca bodhisattvāḥ sa-devamānuṣa-asura-ganḍhavaṣ ca loko Bhagavato bhāṣitam abhyānanadannya iti.</td>
</tr>
<tr>
<td>Gomez-Silk-1989, p.107, folio 12b</td>
<td>idam avocad Bhagavān āttamanāḥ sthavīra subhūtīs te ca bhikṣubhiṣkunyupāsakopāsikāḥ sadevamānuṣāsuraganḍhavaṣ ca loko bhagavato bhāṣitam abhyānanadannya.</td>
</tr>
</tbody>
</table>

Müller (1894: 144) translates the last sentence of section 32 like this: "Thus spoke the Bhagavat enraptured. The elder Subhūti, and the friars, nuns, the faithful laymen and women, and the Bodhisattvas also, and the whole world of gods, men, evil spirits and fairies, praised the preaching of the Bhagavat". Harlez (1891: 499) says: "Ainsi parla le bienheureux transporté, hors de lui. Et Subhūti le vénérable et les bhixus et les disciples des deux sexes et les bodhisattwas, ainsi que les dévas, les hommes, les asuras, les gandharvas, applaudirent aux paroles du bienheureux." In both cases, Buddha is "enraptured". However, Conze (1974: 62) breaks the line after "Bhagavān", making it clear that it is not Buddha who is "enraptured", but the audience. According to Gomez & Silk (1989: 95), Chakravarti’s (1956) edition was "full of mistakes and distortions". He omitted entire words and read incorrectly many vowels. Gomez & Silk (1989) pointed at the many mistakes found in Chakravarti (1956) and in Dutt (1959), but it is interesting to note that Oguihénine (1996: 252) criticized Gomez & Silk (1989), calling it a simplified reproduction, that did not take care of the paleographic particularities of the Gilgit manuscript. However, we choose here to quote Gomez & Silk (1989). There are no punctuation marks in the reading of the manuscript, so it cannot really help us to solve the

---

16 Folios 26-46 of the Schøyen manuscript correspond to sections 1 to 16c. The second half of the sutra is missing.
First, we note that there is no coherence in the punctuation of the texts. The Taishō punctuation is different. Only in T.238 there is a full stop at the end of the whole paragraph, and the other five texts do not have any punctuation at the end of the sentences. T.236a is interestingly different from T.235. The first part of the sentence is exactly the same, but after "優婆夷" there is a full stop. Then, Bodhiruci adds "菩薩摩訶薩." (Conze 1974: 62) "te ca bodhisattvāḥ," meaning "and the bodhisattvas also"). "乾闥婆等" ("the celestial musicians and so on") is also absent in T.235. However, it is clear in these two texts that it is not the Buddha who is enraptured, but Subhūti and the other beings ("皆大歡喜"). In T.236a, we can read "菩薩摩訶薩": 菩薩 is the Chinese translation of bodhisattvas and 摩訶薩 of mahasattvas. In T.239, we see "及諸菩薩摩訶薩" (translation of "te ca bodhisattvāḥ").

The word āttamana(s) in Pali becomes attamana in the masculine plural nominative. In the Diamond Sutra, "āttamana" ("delighted", "filled with joy" or "enraptured", from ātta ‘seized, taken away’ and manas ‘mind’) is not the masculine singular nominative of the classical Sanskrit word āttamanas, but the masculine plural nominative of the hybrid Sanskrit word āttamana(s)17. Being a plural, it cannot apply to the World-Honored One (Bhagavān). There is no reason why the Buddha should feel satisfied and “filled with joy” for having spoken to Subhūti. It is quite obvious that it is Subhūti and the audience that should rejoice after having heard the Buddha.

In fact, there are three possibilities concerning āttamanāḥ(ḥ). The first one connects

---

17 Edgerton (1970: 92) says about āttamana(s): "applied to the audience at the end of a discourse by Buddha".
the adjective to Bhagavân ("Thus spoke the Blessed One enraptured"), like in Müller’s translation and in T.238 according to the Taishō ("此語。世尊歡喜。"). The second one connects āttamanā(ī) to Subhūti alone, making the adjective a masculine singular nominative. The third one connects āttamanā(ī) a first time to Subhūti and a second time to all the beings. According to Kajiyama (1977), the Tibetan translators have been influenced by the Abhisamayālaṃkārakāloka by Haribhadra (Vaidya 1961: 556-557), a commentary of the Aṣṭasahasrika. As cited and translated by Kajiyama (1977), Haribhadra considers that everybody is enraptured, even Buddha: "The Blessed One, being enraptured, has spoken so, the saintly Subhuti, being enraptured, has exalted the world...".

Therefore, "enraptured" belongs to Subhūti and to all the beings, and not to the Blessed One. Ca ("and") is a connection: Subhūti rejoices and his joy is shared by all the beings (his joy is almost contagious). There are two ca: one after Subhūti and one after gandharvas. It means there is no ca close to Bhagavân. If ca really is a connection between "enraptured" and the beings, the Sanskrit text shows that the Blessed One is not connected to āttamanās. "Thus spoke the World-Honored One." marks the end of the Buddha’s teaching. And as a consequence, people rejoice and thank him.

In conclusion, here is our translation of this sentence for T.238: "Thus spoke the World-Honored One. Filled with joy, the Elder Subhūti, together with the monks and nuns, the laymen and laywomen, the universe of gods, men, spirits and celestial musicians cheered the teaching of the World-Honored One." Our corrections are shown in Table 8.

18 In T.237, a comma has been restored after 一切世間 and 踊躍歡喜.

19 T.220 online is punctuated like in the Taishō. We punctuate it like the other texts. We add a
As we saw before, it is better to add a comma (,) after Bhagavān, as a mark of respect. This, of course, should be applied to the entire text, for the sake of coherence. In the special case of T.238, there will be a full stop after 世尊 in order to clearly separate it from 欽喜. The full stop is restored for all the versions where it is missing at the end of the sentence, such as in T.237. For the rest of the punctuation marks, we follow the online versions made by CBETA when it is coherent. In T.220, the CBETA did not change the Taishō’s punctuation. We have changed it. We do hope that the texts of the Diamond Sutra will now have a more accurate, modern, and coherent punctuation. This will help scholars who wish to study and translate the Chinese versions of this important sutra.

5. Conclusion

In this paper we have pointed out that there is no punctuation marks used in the earlier Chinese Buddhist Canon. The first Tripitaka which used punctuation marks is Taishō Tripitaka which was published between 1924 C.E. and 1929 C.E. However, only ‘periods’ are used. The CBETA Tripitaka has done much work in providing modern punctuations marks; however, some more improvements are needed. In this paper, we choose the Diamond Sutra as starting point and give four examples to elaborate the need of correct punctuation marks for better understanding of the texts based on the Sanskrit texts. We hope that we will have this opportunity to bring to light the problems of punctuation of the Chinese versions and to propose useful solutions to the Buddhist Community and to the other scholars in the field. We also hope that other scholars and clerics will follow us in making the Taishō edition more accurate and more accessible to the modern reader.

comma after 薄伽梵 as a mark of respect.
20 Same punctuation mark like for T.236a.
